TREKPOD

*It looks like a hiking staff, but the height-adjustable **TrekPod** combines a fully integrated tripod with a quick-release camera mount and gun rest all in one, stylish and unobtrusive design. It can be converted from a staff to a tripod rest in seconds if a long shot presents itself while hiking to your deer stand. The unique **MagMount** system included with the **TrekPod** is capable of securely holding most 35 mm cameras—up to 9 pounds—yet it comes off almost instantly for quick shots. The **Trek-Tech ShotRest** attachment also lets you easily switch from viewing game to shooting. www.trek-tech.com; (503) 459-0030*
