

T'Pod™ and MagMount™ by Trek-Tech

T'Pod™ is a tough, table-top sized tripod that deploys instantly with its unique MagConnect™ system and packs into a 3.5" x 1.5" x 8.5" carry case (included). T'Pod also utilizes Trek-Tech's innovative MagMount™ system for instant mounting of cameras and other optical devices.

T'Pod is a high quality device intended for use with digital and film SLR cameras, full-sized spotting scopes and laser range finders.

MagMount™ is an industry-first, magnetic quick-release camera and optical device mounting system. It provides for the instant attachment of almost any camera, spotting scope or other device that uses industry standard 1/4"-20 mounting threads. The MagMount is a standard feature of the T'Pod, but is also available as a separate accessory.

SPECIFICATIONS:

Limited Lifetime Warranty. For complete warranty details visit trekpod.com, call us at 503.459.0030, or ask your retailer for details.
