

TrekPod II™ and MagMount™ by Trek-Tech

TrekPod II™ in Tripod Mode

TrekPod II™ in Hiking Mode

TrekPod II is Trek-Tech's entry-level combination of a lightweight, height-adjustable hiking staff with a fully-integrated tripod. It incorporates Trek-Tech's MagMount system but uses a cost-effective foam grip and polymer palm rest in place of the original TrekPod's natural cork, uses a non-adjustable wrist strap, and has a dark gray finish.

Magmount™ is an industry first, magnetic quick-release camera and optical device mounting system. It provides for the instant attachment of almost any camera, spotting scope or other device that uses 1/4-20 industry standard mounting stud. MagMount is a standard feature of the TrekPod and TrekPod II, but is also available as a separate accessory.

SPECIFICATIONS:

Limited Lifetime Warranty. For complete warranty details visit trekpod.com, call us at 503.459.0030, or ask your retailer for details.
