

TrekPod™ and MagMount™ by Trek-Tech

TrekPod in tripod mode

TrekPod in hiking-monopod mode

TrekPod™ is the unique combination of a lightweight, height-adjustable walking/hiking staff-monopod with a fully-integrated tripod. It also incorporates an innovative, quick-release mounting system called MagMount.

MagMount™ is an industry first magnetic quick-release camera and optical device mounting system. It provides for the instant attachment of almost any camera, spotting scope or other device that uses the industry-standard 1/4"-20 mounting stud. The MagMount is a standard feature of the TrekPod, but is also available as a separate accessory.

SPECIFICATIONS:

Limited Lifetime Warranty. For complete warranty details visit trekpod.com, call us at 503.459.0030, or ask your retailer for details.
